

Manage the safe return to work with GoBright

As the Government's Job Retention Scheme comes to an end, businesses are looking into the best ways to get their staff back to work. A key focus of these discussions is how to ensure employee and visitor safety in a post-lockdown office.

To try and make the decision easier for you, we would like to share with you four technologies that we believe will play an important role in the 'new normal' workplace.

Intelligent Hotdesking

- Book a desk before travelling to office – via mobile app or GoBright web portal.
- Check into a desk contactlessly via RFID card, or desk sensor.
- Desk status LED - Purple light automatically appears after desk use, indicating cleaning required.
- Desk availability to enforce social distancing guidelines. Individual desks can be rendered unavailable (see diagram).
- GoBright analytics provides visibility of desk/room usage trends either globally or in specific building areas. This information can be used to plan staggered start/end times for employee groups, or respond with changes to office design.
- Data can be used to monitor and respond to changing usage as required.

Room Booking Systems

- ✓ Adjust the capacity of a meeting room, to make it simple to find a meeting space that can support your meeting safely.
- ✓ Wayfinder helps direct people via a safe route to the meeting room.
- ✓ Meeting rooms can be closed to bookings temporarily, in line with any social distancing policies.
- ✓ Check in/out of a room contactlessly via room sensor.
- ✓ AV room control ensures automation of certain tasks when meeting room is checked into – TV on, AV input selected etc. This helps minimise contact with common surfaces (power switch, remote control etc).

Visitor Management & Sign In

- ✓ Pre-registration reduces queue time in reception areas, as visitors details are already pre-recorded before visit.
- ✓ Visitors can scan a QR code on arrival for vastly reduced touch contact (for unmanned receptions).
- ✓ Reception staff can also check in pre-registered visitors quickly via the Visitor page in the GoBright portal, for a fully contactless, and quick sign-in experience.
